PRE-DIAGNOSIS · PACHECO STUDIOS · 21 OCTOBER 2026

TSHIRTS DO SUL

A print studio in Faro with 30 years on the presses and an online shop that is one week old. What is holding growth back, what to change first, and how it looks with Pacheco Studios.

Built only from public information: Instagram @tshirtsdosul2, tshirtsdosul.com and the shop's policy pages. No call with the owner and no internal data. Everything here is a starting point for the screening call.

P published 0 observed on the site/Instagram E estimate based on market data and industry benchmarks

1 · WHERE THINGS STAND

AREA	AS IT IS	SOURCE
What it is	Design and print studio in Faro (Av. Calouste Gulbenkian 12A), with its own range of tees, sweats and caps and a bespoke printing service	0
Experience	Over 30 years in the industry; screen print, DTG and DTF on in-house presses; 190 gsm t-shirts	0
Online shop	Shopify, English only, sells in EUR and GBP (16 EU countries + UK)	0
Catalogue	19 products visible, all created between 13 and 20 October 2026: the shop is about one week old	0
Prices	T-shirt €15 · sweat €35 · trucker cap €25 · Halloween €10–15	0
Instagram	@tshirtsdosul2: 87 followers, following 371; bio in English, logo in Portuguese; 2 highlights	0
Google	A search by name and address returned no listing and no mentions of the brand	0
Contact	Phone and Gmail address only on the policy page; no WhatsApp button, no chat	0
Shipping	"We ship within 5 working days"; shipping costs and free-shipping threshold not shown	0
Returns	14 days, requested by email; custom items non-returnable	0
Scale	E1 · single counter: 1–3 people, the owner decides everything	E

Implied audience: the designs (Full English, Let's Go to the Pub, Peasants Revolt 1381, 2 Wheelers Faro Club) and the GBP pricing speak to the British community in the Algarve and to people visiting Faro. The local collection (Algarve Marisco, Faro Sunset, Free Space Ria Formosa) is a quality souvenir. 0

2 · TWO BUSINESSES IN ONE

OWN BRAND

€15 t-shirts sold to people who already follow the brand. Today that is 87 people. It needs an audience before it needs automation.

BESPOKE PRINT STUDIO

Restaurants, bars, surf schools, clubs, events and companies order dozens of pieces at a time. On the site it is only a secondary link.

> **The thesis:** the brand is the shop window and the studio is the fastest money. The brand proves the quality; the studio pays the bills while the audience grows. E

3 · MAIN CONSTRAINT

10 M+

passengers through Faro airport in 2025, the first time above 10 million P

Postal do Algarve · RTP

70.22 %

published average cart abandonment rate in online retail P

Baymard Institute

Demand (visibility)

A one-week-old shop, 87 followers and no Google presence. Not enough requests are arriving yet for response time or follow-up to be the bottleneck.

Secondary: conversion through trust

Visitors don't see shipping costs, have no WhatsApp at hand and the contact details are hidden in the policies. On a new site with no reviews, every unanswered doubt is a purchase that doesn't happen.

4 · AS IT IS VS WITH PACHECO STUDIOS

AREA	AS IT IS	WITH PACHECO STUDIOS
Positioning	"T-shirts you'll want to be seen in": the same as a thousand brands	"Printed in Faro for 30 years": brand + studio, with the Algarve collection up front
Logo	Circular seal with three typefaces, hard to read small	New, professional identity that works on a label, a cap, the site and the shopfront
Bespoke studio	Secondary link, no price or lead time	Own page with a quote tool: garment + quantity + method → indicative price and a reply within minutes
B2B customers	Waiting for them to turn up	List of Algarve businesses with a ready-made message; the owner only sends and closes
Instagram	87 followers, following 371, bio with no call to action	Bilingual bio with WhatsApp, 3 pinned posts, reels of the printing process
Google	No listing	"T-shirt printing in Faro" listing with studio photos and a review requested from every customer
Website	Contact hidden, shipping unpriced, English only	New PT + EN site: visible WhatsApp, clear shipping by country, free shipping above a threshold, shop and studio side by side
Carts	No visible sequence	Emails at 1 h / 24 h / 72 h with the item left behind
Messages	The owner replies when she can	Assistant for sizes, shipping, order status and quotes; hands the owner what needs a decision
Content	Loose posts	Friday drop, EN + PT captions generated and approved by the owner

5 · IDEAS BY IMPACT AND EFFORT

`QUICK WINS` **weeks 1–2**

1. **Tidy the front door.** Bilingual bio with "Custom orders → WhatsApp", stop following random accounts, pin 3 posts: who we are, the studio, the Algarve collection.
2. **Trust on the site.** WhatsApp on every page, shipping by country, free shipping above a threshold, VAT number filled in and the Portuguese complaints-book link (legally required; we didn't see it).
3. **Google Business listing** "T-shirt printing · Faro" with photos of the presses.
4. **Cart and welcome:** switch on Shopify's sequences with 3 emails in the brand's voice.
5. **Clean the catalogue:** 17 of 19 products have no product type; two "Algarve Marisco" with the same name at €15 and €35.

`BIG SWINGS` **months 1–2**

6. **B2B line "the Faro studio".** 50 Algarve businesses that dress a team or sell merchandise. The AI builds the list, each message and the follow-ups; the owner sends.
7. **Bespoke quote tool with follow-up.** Form → price from the owner's rate card → proposal by email/WhatsApp → reminder on day 2 and day 5.
8. **Algarve collection in Faro shops.** Consignment or wholesale in souvenir shops, hotels and surf shops.

`NICE-TO-HAVES` **once there is volume**

9. **DM and WhatsApp assistant** for sizes, shipping and order status, with handover to the owner.
10. **Process reels:** "from screen to tee" in 15 s, twice a week.
11. **Photo reviews** requested 10 days after delivery.

`DEPRIORITISE` **for now**

- Paid ads before there is content, reviews and clear shipping: the money would go to a site that doesn't convert yet.
- Opening more channels (TikTok Shop, Etsy) before the shop and the studio have a steady flow.

6 · WHERE AI COMES IN (AND WHERE IT DOESN'T)

FLOW	WHAT THE AI DOES	WHAT STAYS WITH THE OWNER
Quotes	Reads the request, applies the rate card, sends the proposal and follows up	Prices outside the card and tight deadlines
B2B outreach	List, personalised message, reminders	Sending and closing
Carts	Email sequence with the right product	Whether there is a discount and how much
DMs and WhatsApp	Repeated questions, order status	Complaints, exchanges, special requests
Content and catalogue	EN + PT captions and descriptions, product types, SEO copy	Approving before publishing
Never automate	The design of the pieces and print quality control: that is what the brand sells	

Without internal data we don't give revenue figures. The audit measures: quote requests per month, % answered within 24 h, % closed, average B2B vs B2C ticket and carts per month. Recovered revenue = lost requests × close rate × average ticket. E

7 · WHAT TO CONFIRM AT SCREENING

- Annual turnover and the split between bespoke studio and own brand
- Online sales since launch and abandoned carts
- Quote requests per month, where they arrive and how fast they are answered
- Studio rate card: minimums, methods, lead times
- Who decides, Android or iPhone, whether a Google listing exists under another name
- What happened to the first Instagram account
- Commercial model: online shop, wholesale, B2B

8 · THE NEXT LEVEL

A change proposal in three pieces, delivered together:

1. **New identity.** Professional vector logo, with versions for light and dark backgrounds, label, cap and social media.
2. **New PT + EN website.** Shop with the current collections, bespoke page with quote tool, WhatsApp on every page, clear shipping, complaints book and Google listing linked.
3. **The system behind it.** Automatic replies and follow-up on quotes and carts, with the owner always in control of decisions.

A good month is only good until it becomes a normal month.
