PARTNER PROGRAMME

# INTRODUCE A BUSINESS. WE PROVE THE VALUE.

Pacheco Studios is an AI systems consultancy. We find where a business loses requests, time and money, design the system that fixes it, and prove the impact before scaling. This programme is for people who work with companies every day: accountants, consultants, print shops, estate agents, suppliers.

## €0

the audit is not charged separately: it is credited to the implementation

## 10%

of the implementation, when we start working with the business you introduced

## 10%

every 3 months, for as long as that business stays with us

01 · HOW IT WORKS

# THE CLIENT SEES VALUE BEFORE PAYING. THE PARTNER EARNS WHEN THE WORK STARTS.

01 — YOU

### You introduce us

Know a business losing requests, time or money? Introduce us to the owner or decision-maker, with their consent.

02 — NO SEPARATE COST

### We run the audit

We map the operation, find the most valuable leak and show the system that fixes it. The business does not pay for the audit separately.

03 — 10%

### Implementation starts

If the business decides to go ahead, the audit becomes part of the implementation. At that point you earn 10% of the implementation value.

04 — 10% / QUARTER

### We stay with the client

For as long as the business keeps working with us, you receive 10% of what it pays us, every 3 months.

## WHAT THE AUDIT GIVES THE BUSINESS YOU INTRODUCE

Diagnosis before tools. A website, a WhatsApp assistant or an automation only comes in if it is the right answer.

01 **One-page diagnosis**
Symptom, root cause, baseline number and first recommendation.

02 **Operations map**
Channels, people, tools, delays and the points where requests get lost.

03 **Priorities**
Impact, feasibility, risk and time to value, to choose a single intervention.

04 **90-day plan**
What to measure, what to pilot, who approves and which decision comes out of the pilot.

05 **System Print**
The future system in one visual: what triggers it, who owns it, which rule it follows and when a person steps in.

02 · WHO TO INTRODUCE

# BUSINESSES THAT ALREADY SELL, BUT LEAK ALONG THE WAY.

## SIGNS OF AN OPERATIONAL LEAK

- Requests arrive by WhatsApp, phone and e-mail and sit unanswered or with no owner
- The owner answers the same questions every day and has no time left to manage
- Missed bookings, clients who do not return, quotes nobody follows up
- The team copies data between spreadsheets, tools and messages
- The business is growing and operations can no longer keep up

## WHAT THE INTRODUCED BUSINESS GETS

- An audit of its operations, with no separate cost: credited if it goes ahead
- Its most valuable leak named, with a baseline number
- A measured pilot before any larger commitment
- Accounts and data always in the business's name; important decisions stay with people

## HOW TO INTRODUCE US (PICK ONE)

### WhatsApp group

Create a group with the owner and us, and introduce us in two lines.

### The contact, with consent

Send us the business name and phone after telling the owner we will call.

### Your name

Give them our number; they tell us you sent them.

## MESSAGE READY TO FORWARD TO THE OWNER

Hi! I recommend Pacheco Studios (Tomás). They audit your operations: they show where requests, time and money are lost, and what to fix first. The audit is not charged separately. Here is his number: +40 723 098 556.

**Request the audit**
Scan: WhatsApp opens with «AUDIT».
wa.me/40723098556

## HOW WE DESIGN EVERY SYSTEM

**TRIGGER**
What happened: a request, a booking, a payment.

**OWNER**
Who takes the next action. Never an inbox with no name.

**RULE**
What the system can and cannot do.

**HANDOFF**
When a person steps in: a question, a complaint, a decision.

**WE FIND THE LEAK. WE DESIGN THE SYSTEM. WE PROVE THE IMPACT.**

03 · THE TERMS, IN SHORT

# CLEAR FROM THE START, PAID ON TIME.

| CLIENT STAGE | THE CLIENT PAYS | THE PARTNER RECEIVES |
|---|---|---|
| Audit | Credited to the implementation | — |
| Implementation | Value agreed with the client | **10%** |
| Ongoing support | For as long as it stays with us | **10% / 3 months** |

Each project has its own value, set by its impact on the business. There is no price list: the commission is always a percentage of what the client actually pays.

## THE RULES

**When it is paid**
Implementation: within 7 days of the client's payment. Ongoing support: every 3 months, within 7 days of the quarter's close. By bank transfer, against an invoice (company) or a simple collaboration agreement (individual).

**What counts as an introduction**
You introduce us directly to the owner or decision-maker; the business knows and agrees; it was not already talking to us; implementation starts within 180 days.

**No limits**
No minimum number of introductions and no cap. Every implementation that starts from you counts.

**Transparency**
If you talk about us publicly once the partnership is active, mention that it is a partnership. We never ask for contact lists and never contact anyone without consent.

**What we do not promise**
We do not promise results before measuring them. Every audit starts from a baseline and every pilot shows the before and after.

## AGREEMENT IN PRINCIPLE

We have read the terms above and want to start introducing businesses. The details go into a simple agreement signed by both parties.
